PROFESSIONAL SUMMARY

Full-Stack MERN Developer with hands-on experience building and deploying production-grade web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in crafting responsive UI components, designing and integrating RESTful APIs, and writing clean, reusable, and efficient code. Demonstrated ability to optimize applications for maximum speed and scalability, serving 10,000+ active users with measurable performance improvements. Strong understanding of Git/GitHub workflows, Docker-based deployments, and agile collaboration. National hackathon winner (4x) with strong project experience and a fast-learning, team-oriented mindset.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js — full-stack end-to-end development
Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive Web Design, Next.js 15, Socket.io
Backend & APIs: RESTful API Design, WebSockets, Prisma ORM, Mongoose, Zod Validation, Middleware
Databases: MongoDB, MySQL, PostgreSQL, Redis (Distributed Caching & Session Management)
DevOps & Tools: Git/GitHub, Docker, AWS Basics, CI/CD Pipelines, Postman, Linux (Bash)
Security: JWT Authentication, RBAC, OAuth 2.0, SQL Injection Mitigation, CSRF Protection
CS Core: OOP, SOLID Principles, DSA, System Design (LLD/HLD), DBMS, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer — US-Based FinTech Project Jan 2026 – Present

- **Built and maintained** full-stack web application features using a Node.js/Express.js backend with React-compatible RESTful API contracts, reliably serving 10,000+ active users with zero reported security breaches.
- **Architected** MongoDB and PostgreSQL schemas with advanced indexing strategies, reducing database load by 40% and significantly accelerating complex query execution for real-time reporting dashboards.
- **Implemented** Redis-based distributed caching layer, achieving a 40% reduction in API response times and improving overall throughput under high-concurrency traffic.
- **Wrote clean, reusable** Express.js middleware with Zod input validation and structured error-handling, reducing runtime exceptions by 25% and ensuring seamless front-end and back-end integration.
- **Collaborated** actively via Git/GitHub through code reviews, feature branching, and iterative architecture improvements, maintaining clean and well-documented production codebases.

SELECTED PROJECTS

VibeCode — AI-Driven MERN Cloud IDE — GitHub Ongoing

- **Developed** full-stack browser IDE using Next.js 15 (React) frontend and Node.js/Express.js backend with MongoDB persistence, OAuth 2.0 auth, and real-time Socket.io collaborative editing.
- **Containerized** execution engine via Docker for secure multi-language compilation; integrated AI-powered LLM engine for intelligent code suggestions, optimizing latency and developer experience at scale.

EchoSphere — Real-Time AI Collaboration Network — Demo Dec 2025

- **Built** a complete MERN stack application with Express.js RESTful APIs, MongoDB aggregation pipelines for complex queries, and a React-based responsive frontend.
- **Deployed** a Pub-Sub event-driven messaging backend processing 500+ events/second, demonstrating deep understanding of scalable server-side architecture and performance optimization.
- **Designed** an intelligent developer-matching algorithm leveraging MongoDB aggregation and skill-similarity scoring, showcasing advanced database querying techniques.

VoteMitra — National Hackathon Winner (TechVrisha) — Demo Aug 2025 – Nov 2025

- **Designed** a RESTful API architecture on Node.js/Express.js capable of handling 1,000+ concurrent requests with sub-200ms latency, achieving high-performance server-side engineering.
- **Integrated** TensorFlow.js AI biometric verification into a React-based frontend achieving 90%+ facial recognition accuracy with a 35% reduction in inference latency.
- **Implemented** an O(1) hash-map based duplicate-vote detection layer enforcing data integrity and fraud prevention, with a scalable MongoDB-backed vote storage system.

EDUCATION

B.Tech in Computer Science (AI/ML) — IMS Engineering College, Ghaziabad 2023 – 2027 — CGPA: 8.7/10
Class XII (CBSE) — SR Public School, Orai 2022 — Percentage: 90.83%

ACHIEVEMENTS & CERTIFICATIONS

- **National Winner:** 1st Place in 4 major hackathons including TechVrisha, ProjectExpo (GeeksforGeeks), and Gemini Buildathon by Google.
- **Competitive Programming:** Solved 600+ DSA problems across LeetCode and GeeksforGeeks, demonstrating strong analytical and problem-solving skills.
- **Certifications:** Full-Stack Web Development (Udemy), Data Science Virtual Experience Program (BCG Forage).
